The Waltham Forest local plan provides the planning policy framework for considering planning applications.

This page provides information on the council's local plan documents, supplementary planning documents and other supporting documents.

## – Shaping the Borough Draft Local Plan 2020 – 2035 consultation

### The Draft Local Plan

There's a lot of work taking place across the borough to make sure we have the homes, work places, transport network, schools, health and leisure facilities that our residents will need in the future.

To help us make sure development happens in a coordinated way we have prepared a Draft Local Plan which will cover the period from 2020 to 2035, It sets out how the borough will meet the challenges of economic, environmental and social sustainability to ensure good growth and sustainable development.

When finally adopted it will replace a number of other planning documents, so all our policies are in one place.

This Plan will shape developments and guide decisions on the location, amount and types of development the borough requires to meet local needs and accommodate good growth.

We now want your views on the ideas we have brought together. The Draft Local Plan recognises the different needs of different parts of the borough and has three sections covering the north, central and south areas of Waltham Forest.

This Plan does not include detailed policies for individual sites as these can be found on the Brownfield Land Register.
